DOMINICA AND SAINT-LUCIA - ITMB map (9781553411642)

Product description

Dominica is the latest addition to ITMB's growing Caribbean map series. The island is a popular holiday vacation destination and cruise ship stopover port. We have in reality placed two maps on the sheet, by adding St. Lucia, another popular Caribbean destination, to the reverse side. Each country is placed on one side of the paper, with insets of their respective capitals, Roseau and Castries. Dominica, with its rugged volcanic terrain, its dominating mountains, and its lush pristine rainforests, has a natural beauty that is a prime reason to visit and enjoy the island's attractions.

In addition, both islands are linked to each other and to Martinique and Guadeloupe by new inter-island ferries. This new system of ferries is joining the islands together for sharing tourism, as well as economic cohesion within the Caribbean. It is now possible to base oneself on Dominica and enjoy day trips to Martinique, for example, or St. Lucia.

Price : \$12.95
