USA ROCKY MOUNTAINS - CARTE ITMB (9781553410379)

Description du produit

This is the latest American regional map that ITMB has published. This one covers Montana, Wyoming, Colorado, and parts of Idaho, New Mexico, and Arizona. It is, of course, the southern extension of the Canadian Rockies map through Blue Sky Montana and Mile High Denver. This is a double-sided map concentrating on roads and road quality, parks, touristic attractions, and urban areas. We feel that the state-by-state approach to mapping the USA just does not work well. With today's infrastructure and vehicular capability, one can pass through three or four states in a normal day drive. There is a place for state maps (Alaska, California, Florida, Hawaii, Texas) where size matters, but there is a real need for regionally-based maps as well. Rand is publishing an increasing number, but these are really extensions of city maps into surrounding local communities. It is a good idea, but we want to focus on the macro level, combining several states together into regional groupings, such as this one, the Deep South map that was released a couple of months ago, and the Northeast Corridor map that is coming out later this year.

Map size: 27*39"

This map is also available in digital format for \$39.95 (per file) and flat map for \$39.95 (per side). Please contact map@itmb.com if you would want to place an order or for more information.

Legend Includes:

Roads by classification, US Divided Highway, Mountain peak, State park, National park, Ferry Route, Historic Route 66, Hot Spring, Museum, Skiing, Beach, Cave and much more.

Prix : 9.95\$
